|              |                                                                                                                               |
|--------------|-------------------------------------------------------------------------------------------------------------------------------|
| Model        | SGJX152                                                                                                                       |
| Material     | Aluminum                                                                                                                      |
| Weight       | 15kg                                                                                                                          |
| Dimensions   | 1000mm                                                                                                                        |
| Features     | 1. High precision processing<br>2. High strength and durability                                                               |
| Performance  | Processing speed 24~36 pieces/min                                                                                             |
| Capacity     | 500,000~1,000,000 pieces/year                                                                                                 |
| Accuracy     | Processing accuracy ±0.05mm                                                                                                   |
| Efficiency   | T/T 30% compared to traditional methods                                                                                       |
| Cost         | Low cost and high efficiency                                                                                                  |
| Advantages   | 1. High precision<br>2. High strength and durability<br>3. High efficiency<br>4. High accuracy<br>5. FDA approved             |
| Applications | 1. High precision processing<br>2. High strength and durability<br>3. High efficiency<br>4. High accuracy<br>5. FDA approved. |
