**hand”**  
 Every SCANPAN aluminum product is cast by hand and goes through eight sets of hands. The minutely-controlled process begins with recycled aluminum, from scrap or cans, which is melted down.

**Tradition**  
**Innovation**

**Did you know...?** SCANPAN was founded in 1954 in Denmark, where tradition meets innovation. Our products are made with a focus on quality and sustainability. We use recycled materials and energy-efficient processes to create products that are both functional and beautiful. SCANPAN is committed to being a responsible and environmentally friendly company.

**Sustainable materials**  
 Customers are also guaranteed an environmentally-friendly

handle and, after a final quality check, the product is packed in recycled materials and prepared for sale. Polishing with Danish beeswax continues to be an important part of the finishing process for SCANPAN's pressure-cast frying pans.
